#### PACENT COOPERATION TREATY

#### From the INTERNATIONAL BUREAU

### **PCT**

#### **NOTIFICATION OF ELECTION**

(PCT Rule 61.2)

Commissioner
US Department of Commerce
United States Patent and Trademark
Office, PCT
2011 South Clark Place Room
CP2/5C24
Arlington, VA 22202

Date of mailing (day/month/year)
06 June 2001 (06.06.01)

International application No.
PCT/US00/07817

International filing date (day/month/year)
22 March 2000 (22.03.00)

ETATS-UNIS D'AMERIQUE
in its capacity as elected Office

Applicant's or agent's file reference
PF-0681 PCT

Priority date (day/month/year)
22 March 1999 (22.03.99)

Applicant

YUE, Henry et al

1.	The designated Office is hereby notified of its election made:
	X in the demand filed with the International Preliminary Examining Authority on:
İ	
	11 October 2000 (11.10.00)
	in a notice effecting later election filed with the International Bureau on:
2.	The election X was
	was not
	made before the expiration of 19 months from the priority date or, where Rule 32 applies, within the time limit under
	Rule 32.2(b).
	$\cdot$
	·

ВхІ	Observations where certain claims w r f und unsearchable (C ntinuation of item 1 of first sheet)
This Inte	ernational Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:
1. X	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:
	Although claim 16 is directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
2. X	Claims Nos.: 18,19,21,22 because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
	see FURTHER INFORMATION sheet PCT/ISA/210
з	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
Box II	Observations where unity of invention is lacking (Continuation of item 2 of first sheet)
This Inte	ernational Searching Authority found multiple inventions in this international application, as follows:
	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2.	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. X	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:  1-23 ( ALL DADTIALLY)
	1-23 ( ALL PARTIALLY)
Remark	on Protest The additional search fees were accompanied by the applicant's protest.
	No protest accompanied the payment of additional search fees.

Claims: 1-23 (all partially)

Invention No.: 1

An isolated polypeptide comprising the amino acid sequence of SEQ ID NO:1 or homologues or fragments thereof; an isolated polynucleotide encoding said polypeptide; a recombinant polynucleotide comprising a promoter sequence operably linked to said polynucleotide; a cell transformed with said recombinant polynucleotide; á transgenic organism comprising said recombinant polynucleotide; a method for producing said polypeptide; an isolated antibody which specifically binds to said polypeptide; an isolated polynucleotide comprising the polynucleotide sequence of SEO ID NO:30 or homologues or complements thereof; a method for detecting a target polynucleotide in a sample, wherein said target polynucleotide has a sequence of above polynucleotide; a pharmaceutical composition comprising an effective amount of above polypeptide; a method for treating a disease or condition comprising administering said pharmaceutical composition; a method for screening a compound for effectiveness as an agonist or antagonist of above polypeptide; a method for screening a compound for effectiveness in altering expression of a target polynucleotide, wherein the target polynucleotide comprises above isolated polynucleotide.

2. Claims: 1-23 (all partially)

Inventions Nos.: 2-28

Inventions no. 2-28 relate to subject-matter as defined above for "invention 1", with the exception, that inventions no. 2-28 refer to one of the polypeptide sequences SEQ ID NO:2 to SEQ ID NO:23 and SEQ ID NO:25 to SEQ ID NO:29 (and the respective polynucleotide sequences SEQ ID NO:31 to SEQ ID NO:52 and SEQ ID NO:54 to SEQ ID NO:58).

Continuation of Box I.2

Claims Nos.: 18,19,21,22

Claims 18 and 19 refer to an agonist compound and its use, wherein said agonist is identified by a method according to claim 17, without giving a true technical characterization of said agonist compound. Moreover, no such compounds are defined in the application. In consequence, the scope of said claims is ambiguous and vague and their subject-matter is not sufficiently disclosed and supported. The above comment also applies to claims 21 and 22, which refer to an antagonist compound and its use.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.

national application No. PCT/US 00/07817

Box I	Observations where certain claims w re found uns archable (Continuation of item 1 of first she t)
This Interr	national Search Report has not been stablished in respect of certain claims under Article 17(2)(a) for the following reasons:
1. X	Claims Nos.: ecause they relate to subject matter not required to be searched by this Authority, namely:
	Although claim 16 is directed to a method of treatment of the human/animal body, the search has been carried out and based on the alleged effects of the compound/composition.
b	claims Nos.: 18,19,21,22 ecause they relate to parts of the International Application that do not comply with the prescribed requirements to such n extent that no meaningful International Search can be carried out, specifically:
i	see FURTHER INFORMATION sheet PCT/ISA/210
	claims Nos.: ecause they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).
D 11 - 6	The continue where write of invention is locking (Continuetion of Item 2 of Great shoot)
	Observations where unity of invention is lacking (Continuation of Item 2 of first sheet)
This Interr	ational Searching Authority found multiple inventions in this international application, as follows:
	s all required additional search fees were timely paid by the applicant, this International Search Report covers all
	earchable claims.
	s all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment fany additional fee.
	s only some of the required additional search fees were timely paid by the applicant, this International Search Report overs only those claims for which fees were paid, specifically claims Nos.:
4. X	to required additional search fees were timely paid by the applicant. Consequently, this International Search Report is estricted to the invention first mentioned in the claims; it is covered by claims Nos.:
	1-23 ( ALL PARTIALLY)
Remark o	n Protest
	No protest accompanied the payment of additional search fees.

1. Claims: 1-23 (all partially)

Invention No.: 1

An isolated polypeptide comprising the amino acid sequence of SEO ID NO:1 or homologues or fragments thereof; an isolated polynucleotide encoding said polypeptide; a recombinant polynucleotide comprising a promoter sequence operably linked to said polynucleotide; a cell transformed with said recombinant polynucleotide; a transgenic organism comprising said recombinant polynucleotide; a method for producing said polypeptide; an isolated antibody which specifically binds to said polypeptide; an isolated polynucleotide comprising the polynucleotide sequence of SEQ ID NO:30 or homologues or complements thereof; a method for detecting a target polynucleotide in a sample, wherein said target polynucleotide has a sequence of above polynucleotide; a pharmaceutical composition comprising an effective amount of above polypeptide; a method for treating a disease or condition comprising administering said pharmaceutical composition; a method for screening a compound for effectiveness as an agonist or antagonist of above polypeptide; a method for screening a compound for effectiveness in altering expression of a target polynucleotide, wherein the target polynucleotide comprises above isolated polynucleotide.

2. Claims: 1-23 (all partially)

Inventions Nos.: 2-28

Inventions no. 2-28 relate to subject-matter as defined above for "invention 1", with the exception, that inventions no. 2-28 refer to one of the polypeptide sequences SEQ ID NO:2 to SEQ ID NO:23 and SEQ ID NO:25 to SEQ ID NO:29 (and the respective polynucleotide sequences SEQ ID NO:31 to SEQ ID NO:52 and SEQ ID NO:54 to SEQ ID NO:58).

Continuation of Box I.2

Claims Nos.: 18,19,21,22

Claims 18 and 19 refer to an agonist compound and its use, wherein said agonist is identified by a method according to claim 17, without giving a true technical characterization of said agonist compound. Moreover, no such compounds are defined in the application. In consequence, the scope of said claims is ambiguous and vague and their subject-matter is not sufficiently disclosed and supported. The above comment also applies to claims 21 and 22, which refer to an antagonist compound and its use.

The applicant's attention is drawn to the fact that claims, or parts of claims, relating to inventions in respect of which no international search report has been established need not be the subject of an international preliminary examination (Rule 66.1(e) PCT). The applicant is advised that the EPO policy when acting as an International Preliminary Examining Authority is normally not to carry out a preliminary examination on matter which has not been searched. This is the case irrespective of whether or not the claims are amended following receipt of the search report or during any Chapter II procedure.
